

Still Life with Natural Light Series

photographs and text by add Kaden Carmichael

2024

PROJECT STATEMENT (Paste Here - use two pages if needed):

Final Written Reflection:

- My theme is simple with color while showing the texture of food, some challenges were finding the right location for my shoots and how I was going to look at the shots for transferring my idea of simple with color and detail . I wanted to show how even a simple food by itself can show its detail and how a good photo doesn't need to be complex.
 - I wanted to explore what makes these foods visually appealing and learn how to make even the most basic foods look good
 - **How much texture and color is in food.** I wanted to show how food has so much texture and color in it. How much detail can we bring out in a photo of any food?

Still Life With Natural Light 01

RAW file | camera mode: manual | 1/60 sec @ f 8 | ISO 800 | focal length: 51 mm
